Spring 1894.
Catalogue No. 2.

Greenhouse and Bedding Plants

Fruitland Nurseries,
P. J. Berekmans,
Proprietor.

Augusta, Georgia.
Please Read this Before Ordering

In ordering, write your orders plainly upon the Order Sheet attached to this Catalogue. A lady should always sign herself "Miss" or "Mrs." to enable us to direct our answers properly. The same name should always be used.

Filling Orders.—Orders are filled as soon after reception as practicable—seldom later than two days. Should certain varieties of plants be exhausted at the time the order is received, or if they are not in proper shipping condition, the order will only be filled as far as our assortment will allow. We never substitute unless fully authorized. Patrons are respectfully requested to state if substitution is allowed or desired before plants first ordered be exhausted.

Plants by Mail.—As a rule these are so seldom satisfactory, and require more time to prepare for safe carriage than they are worth, that we are compelled to respectfully decline this class of orders.

Packing and Forwarding.—We pack all of our plants free of charge and in such a careful manner that no complaint on that score can possibly be made, as out of 6,000 packages forwarded by Express the past year not one failed to give satisfaction. In every instance have your plants forwarded by Express, as rapid carriage is of the utmost importance. We guarantee every plant to be in a perfectly healthy condition and fully graded to standard when leaving our hands, but after delivery in the hands of forwarders, all losses resulting from delays in transit are at the risk of purchaser.

Terms—Invariably cash with the order, or C. O. D. (collect on delivery) by Express, with collecting charges added. No plants sent C. O. D., unless one-half the amount is remitted before shipment. Our prices are too low to allow any deviation from this rule.

Remittances.—By Postal Orders, Registered Letters, or Bank Draft on Augusta, New York or New Orleans, are the safest. Money or Postal Notes sent through mail in ordinary letters are in all cases at sender's risk. When sending private checks on banks outside of Augusta, please add 15c. for all amounts less than $50: 25c. for amounts of $50 to $100, and one quarter of 1 per cent. for every $100 additional, for cost of collection.

Attention to Customers.—It is our earnest desire that all the requirements and directions of our customers be scrupulously attended to by our assistants, and we practice the utmost personal supervision to see that this is carried out. We would, therefore, respectfully request that we be informed if at any time there is cause of dissatisfaction, that we may have it rectified at the earliest possible moment.

What We Cannot Supply.—Bouquets, Cut Flowers, Flower, Vegetable or Tree Seeds, Horticultural Implements, Labels, Wire, Rustic Work, Hyacinths, Tulips, Crocus, Gladioli, Lilies, Pansies, Violets, and other plants which can be kept in stock but a short period. Orders for some of the above named articles are received almost daily, and much needless correspondence may be avoided if our friends will kindly omit such items from their orders.

Cuttings.—We are frequently asked to sell cuttings. This we have to decline, as our stock plants are kept under high temperature, and cuttings taken from these soon generate damp when packed, and become useless. As it is in fact more troublesome to detach and pack cuttings than to send plants, we cannot accept orders for cuttings under any circumstances.

Answers to Correspondents.—We are in constant receipt of numerous letters asking for information upon horticultural subjects. These we cheerfully answer personally so far as time will permit, but as such demands upon us are numerous, especially at certain seasons of the year, we earnestly request correspondents to state each question plainly and separately, leaving a blank space after each query sufficient for an answer. A stamp to prepay postage is expected with such letters.

CATALOGUES.

The following Catalogues will be mailed free on application:

No. 1.—DESCRIPTIVE CATALOGUE of Fruit Trees, Grape Vines, Strawberry Plants, Evergreens, Roses, Flowering Shrubs, etc., issued in August.

No. 2.—SPRING CATALOGUE of Bedding and Greenhouse Plants, etc., issued in February.

No. 3.—WHOLESALE CATALOGUE for Nurseriesmen and Dealers only, issued in July.

Special lists are issued during the year, giving descriptions and quotations of specialties for nurseriesmen. Address

P. J. BERCKMANS, Augusta, Ga.
To Our Patrons and Friends.

In presenting you with a copy of our Plant Catalogue for the year 1894, we take pleasure in returning our sincere thanks to the numerous friends whose patronage has been so liberally bestowed upon our firm during the past 37 years. Realizing that in order to produce the highest quality of products and offer these at the lowest possible prices, there must be adequate facilities, we rebuilt during the past summer many of our plant houses upon the most improved plans, and added largely to the already vast area of glass.

The Greenhouse and Plant Department

Now covers 45,000 square feet of glass, and consists of three propagating houses each 11x160 feet, four plant houses ranging from 60 to 100 feet, and two new twin Palm houses 40x140 feet. Every modern improved appliances tending to economy in labor and healthy products have been added, and in addition to the plant houses a large quantity of cold frames allow us to safely carry through the winter an immense stock of plants, which in our mild climate do not require artificial heat. With the numerous additions and improvements added to this Department we are prepared to offer plants at such prices as are in keeping with Horticultural progress and the times.

We do not offer premiums, but guarantee the best possible quality at the lowest prices consistent with the cost of production. We would also state that we offer in this catalogue only such classes of plants as are best suited to Southern floriculture, and therefore omit such as are desirable only for cooler latitudes, but seldom successful here. While we purchase all the novelties which we believe to possess distinctive merits, and offer these at the earliest date that they can be propagated, we cannot guarantee that they will give entire satisfaction in every instance, as much of their success depends upon the care they may receive, as well as character of soil and suitable weather.

The "Fruitland Nurseries" are located west of and adjoining the limits of the city of Augusta, on the Washington road (continuation of Broad street.) In the home tract of 400 acres are soils of every texture found in this section of the State, thus enabling every class of products to be grown under the most favorable conditions.

The Nurseries have been owned and conducted by the same management since 1857, and it may interest those not acquainted with our establishment that the

Nursery Department

Is divided as follows, viz: Roses, 25 acres; Shrubs, 10 acres; Fruit Trees, 200 acres; Grape Vines, 10 acres; Evergreens and Deciduous Trees, 10 acres; Small Fruits, 10 acres; Orchard and test grounds, 30 acres.

OUR RESPONSIBILITY

For any business transaction extends only to persons purchasing direct from the nursery. Dealers purchasing from us sell upon their own responsibility. We likewise disclaim any liability for results arising from defective planting at improper seasons, or from subsequent faulty treatment and cultivation, and are not in any respect responsible for any loss or damage rising from any failure thereof. While we exercise the greatest care to have all our plants true to name, well grown, and packed in the best possible manner, and hold ourselves in readiness, on proper proof, to replace all plants that may accidentally prove untrue to label, free of charge, or refund the amount paid therefore, it is mutually understood and agreed to between the purchaser and ourselves that our guarantee of genuineness shall in no case make us liable for any sum greater than originally received for said plants that prove untrue.

The firm consists of P. J. Berekmans, who retains the ownership of the Fruitland Nurseries, and all property connected therewith, as well as the former firm name, and his sons, Louis A., Robert C., and Prosper J. A. Berekmans, Jr., under whose management every branch of the business is carefully conducted.

We have no connection whatever with any other nursery; do not employ agents or salesmen, but all our dealings are made directly with purchasers.
PLANTS AND THEIR CARE.

Preparation of the Soil and Culture.—Borders or beds intended for plants should be well and deeply dug during winter or early spring; the soil well pulverized and supplied with the necessary plant food. A compost of stable manure and cotton seed, well decomposed and thoroughly incorporated with the soil during winter, will be found highly beneficial. The plants should be firmly set, the ball of earth not disturbed, but, in case of latter being wrapped in moss, the moss covering must be removed. When set, water copiously and shade with a pine bough or a board for a few days, and place a mulch of cotton seed, rice chaff or chopped straw around the plants. When fully in growth keep the soil well worked and free from weeds, and remove the mulching.

Time of Planting.—The tender Bedding Plants enumerated in this Catalogue must not be planted out in open ground until spring frosts are no longer to be apprehended. Although the stock of nearly all varieties is ready for shipment when this Catalogue is issued, we would particularly urge patrons not to order plants intended for bedding until they can be safely cared for on arrival. Those possessing greenhouses or pits, or even ordinary cold frames, would, however, be benefited by ordering early in March, except in cases of new plants, of which the number is yet limited, and which are noted as to the time when they can be supplied.

Care of Plants When Received.—The plants should be potted in a size larger pot than they have been grown in, placed in a common cold frame, or greenhouse if possible, until they begin to grow freely. Shade and water must be used as needed. If the plants are required merely for the border, they can be placed in permanent place on receipt, if the weather is somewhat cloudy; but in general it is preferable to allow the plants to recuperate from the effects of the packing and carriage by being kept in a shady place for a few days. Plants are forwarded without pots. This is a saving of expressage to the buyer, and adds to the safety of carrying.

Potting and Soil.—An equal proportion of leaf mould and good loam, to which is added one-quarter of its bulk of cow manure, the whole mass allowed to stand a few months and thoroughly mixed, will suit almost all classes of plants. Decomposed sod with a small quantity of manure is also excellent. Plants should be repotted when needed, and given pots one size larger only than formerly used, and never shifted from a 3-inch to an 8 or 10-inch pot. Many failures arise from using pots of a size too large as compared to the size of the plant. Always use broken charcoal or potsherds in the bottom of all pots above four inches in diameter to give free drainage. Never use saucers unless some gravel or fine cinders are placed under the pots to allow the water to escape freely, and never set the pots on a smooth surface unless means of drainage are provided by placing sand or gravel under the pots.

Plants in Greenhouses.—The natural conditions of plant life include a period of growth succeeded by a period of rest, but all plants do not require rest at the same time, hence to attempt the same treatment for all classes must entail failure. A little experience is necessary when extensive collections of plants are cultivated, and brief directions for special treatment are therefore given under the heads of various classes. Normal conditions of heat, light, air and moisture should always be considered. Great variations of temperature between day and night; over-watering in winter, and especially when plants are in a dormant condition, must be avoided. Give free ventilation during the day whenever the outside temperature is not below 50 degrees. In winter water sparingly; two or three times a week will usually prove sufficient. In summer water more freely, but do not drown the plants, as is too often the case. If a plant shows signs of weakened growth or assumes an unhealthy color, withhold water and repot; the cause of unhealthy condition will often arise from imperfect drainage or over-watering. Use a weak solution of cow manure and water once or twice a week upon plants which are in full growth and during warm weather, but avoid all fertilizers during the period of rest.
Insects.—Few greenhouses may be said to be free from either of the following insects, viz: Green Fly or Aphis, Thrip, Red Spider and Mealy Bug. Whenever plants are infested with either of the above, immediate measures for their destruction must be resorted to. For Green Fly use tobacco, either in the form of snuff or in a weak solution, or by burning tobacco stems to create a dense smoke. For Mealy Bug and Red Spider use Persian Insect Powder, Cole’s Insect Destroyer, or a strong solution of Whale Oil Soap, in addition to the tobacco smoke. These ingredients may be obtained from leading druggists.

Shading.—To counteract the burning effects of the sun, use a coat of common whitewash upon the glass, or, if a lasting shade is required, use naphtha mixed with some white lead, and apply with a syringe.

NOVELTIES.

ARISTOLOCHIA ORNITHOCEPHALA.
(The Bird Aristolochia.)

One of the most singular flowers imaginable. The flowers are of large size, reddish purple in color, veined and marbled as shown in the cut. This plant will grow in any warm situation and flower freely during the fall; of rapid climbing habit, but is not hardy. If planted in a greenhouse it will flower almost continuously, if given ample space. Price 25c.

CALADIUM—New Brazilian.

Late in July, 1893, we received a quantity of Caladium bulbs, which, during the fall months, were the most striking features in our plant houses. The remarkable brilliancy of the colors in some varieties, the waxy delicacy of the leaves in others, were unlike any of the older varieties, and a description of the wonderful combinations of colors and shades is impossible. In some varieties the leaves are bright red with deeper veins; in others there is a rose colored centre which shades off to white. Again, some varieties are with entirely white leaves of waxy texture and so transparent that writing laid underneath may be read through the filmy leaf. Among the many remarkable displays of ornamental foliage plants at the late “World’s Fair,” these new Caladiums were perhaps the most conspicuous and attracted unusual attention.

We offer young plants after May 1st at $1 each, and can supply from twenty to thirty varieties.

*NEW CANNAS—Indian Shot.

Plants started in Pots and Ready after April 1st.

The remarkable improvements which have lately been made in these plants have brought them to the front rank of the ornamental foliage class. Among the best new sorts of late introduction which we selected last summer from the best collections exhibited at the World’s Fair are the following:
Alphonse Bouvier—Foliage green, habit compact and dwarf; flowers of a brilliant crimson, very large, and produced in large branching stems. Begins to bloom early in spring and lasts throughout the whole summer; a grand novelty. Price 25c. each.

Charles Henderson—Flowers very large, brilliant red. 50c.

Florence Vaughan—Flowers very large and broad, yellow spotted, bright scarlet, free blooming and strong habit. This is conceded to be the best yellow variety in cultivation. 50c.

J. C. Vaughan—3½ feet; foliage purple, flower large, clear deep vermillion orange, satiny lustre. 50c.

J. D. Cabos—4 feet; foliage dark; flowers rich apricot with deeper shadings. 25c.

Paul Bruant—Dwarf habit, foliage green, edged purple; flowers orange scarlet. 50c.

Paul Marquant—Foliage green, flowers salmon with long petals. 25c.

Explorateur Crampbell—4 feet; foliage green; flower large, vermillion tinted, with crimson spots. 50c.

CALODENDRON CAPENSIS.

The Cape Chestnut.

This is considered the finest evergreen tree of Natal, South Africa, and although introduced in Europe in the last century it is but seldom seen in cultivation. As its name indicates (from Kalos, beautiful, and Dendron, a tree) it is of handsome appearance. The flesh colored or creamy white flowers, composed of linear oblong petals, are produced in immense terminal panicles; stems and leaves pubescent; latter are large opposite, simple, crenated; branches opposite or three in a whorl. In England it is valued as a handsome greenhouse evergreen tree, and will doubtless become very popular in South Florida, where it is reported to be of a deciduous habit. We offer well grown young plants from 4 and 5 inch pots at $1 each.

CLEMATIS PANICULATA.

Flowers white, star shaped, produced during mid-summer and fall upon long shoots. In addition to its profusion of flowers, the latter are also very fragrant and foliage is handsome; a most desirable new climber, which is attracting much attention. 50c.

CUPHEA LLAVÆ—"New Tricolor Cuphea."

We have tried this during the past two summers and found it one of the most desirable of the new bedding plants. Flowers of tubular shape, with two bright scarlet wings at the end; the tips are bright purple and the stamens white, while the body of the flower is pea green and covered with fine crimson hair. Grows quite bushy, attains a height of twelve inches, and is covered during the entire summer and autumn with a profusion of bloom. 15c., $1 per 10.

DWARF CALLA—Little Gem.

This differs from the old dwarf sort in better blooming qualities. It seldom grows above eighteen inches high; desirable for pot culture. 25c.

GENISTA ANDREANA.

This plant has created a sensation in Europe, where it was offered in 1892 for the first time. It is a Scotch Broom with red flowers, and has already become very popular for forcing, although the plant is pretty hardy here. Flowers in long bunches; ground color of corolla is golden yellow; lower petals with a deep purple border and lateral petals crimson red. The appearance of this plant when in bloom is truly magnificent. Strong imported plants $1 each.

SOLANUM AZUREUM, or SEAFORTHIANUM.

Of the same habit of growth as the Solanum Jasminoides, but producing numerous bunches of delicate blue flowers, with golden anthers and fragrant. While it produces an abundance of flowers if planted in open ground, these are not freely produced until mid-summer and are injured by frost. We recommend, therefore, to grow this beautiful climber in a greenhouse, where the great beauty of its flowers is best seen. Price 25c.

HAMELIA PATENS.

This is as yet very little known, but in South Florida is destined to become a very desirable shrub; 5 to 10 feet high. We have found it here to be a very striking summer and fall blooming greenhouse plant. Flowers bright orange red, lasting a long time. 50c. each.
BEDDING PLANTS.

This class comprises plants suitable for the summer decoration of flower gardens. Several varieties are also very desirable for greenhouse and parlor collections.

Time of Planting.—The most suitable season to plant these varieties is from the time that spring frosts cease until June.

Prices.—It must be understood that the prices as quoted are for plants grown in two and three inch pots, and of the ordinary shipping size. Large specimens at proportionately increased rates.

Special Collections.—Many persons unacquainted with the most desirable classes of plants often find some difficulty in making suitable selections. To prevent disappointment when plants are selected injudiciously, we would suggest to our patrons to order special collections, which are composed of the most desirable classes, and of such as we grow in large quantities for that purpose.

In making these collections we guarantee that they will give satisfaction, and the utmost liberality will be observed in the quantity sent.

100 Bedding Plants, all distinct.................. $5.00
50 Bedding Plants, all distinct.................. 3.00
25 Bedding Plants, all distinct.................. 1.75

Special collections will be supplied at above rates only when selection is left to us. Orders, naming varieties and quantity of each, will be filled at regular Catalogue rates.

GENERAL COLLECTION.

Varieties marked with an asterisk (*) are hardy in this latitude.

**Americana Recurvata**—With recurved leaves; a beautiful variety. 25c. to 50c.

**Americana Variegata**—Margined yellow. 50c.

**Rigua Dentata**—Leaves erect; pale green. 50c. to $1.

**Sisalina (Sisal Hemp)**—Upright; glaucous green; a rapid grower. 50c. to $1.

**AGERATUM.**

Valuable for massing or ribbons and winter blooming; always in bloom and of easy culture. The dwarf growing varieties are the most desirable. 10c. each, 50c. per 10, $4 per 100.

**White Carpet**—Best white.

**John Douglass**—Deep Nazarine blue; very dwarf; best of its color.

**Mexicanum Var**—Pale blue; foliage variegated white.

**ALOE.**

*Plants with or without stems; leaves thick, fleshy, showy, often in a rosette. Very desirable for rock work; thrive best in a mixture of loam and well decomposed manure. Several varieties. 50c. each.

**ALOYSIA**—Lemon Verbena.

Lemon-scented foliage. 15c., $1.25 per 10.
ALOE VARIEGATA.

ALYSSUM—*Sweet Double.*
Double flowering white; valuable for cut flowers; perpetual bloomer; also desirable for ribbon lines or pot plants. 10c. each, 60c. per 10.

*BAMBUSA—Chinese Cane.*  
Very desirable for rock work. 10c. each.

Argentea Nana (*Fortune's*)—Dwarf; variegated white; a well known variety.

Nana—Dwarf; foliage green.

Metake—Very tall; foliage green.

Simoni—Medium height; foliage striped.

CESTRUM.
Free blooming shrubs. 15c. each, $1.25 per 10.

Aurantiacum—Deep orange; spring bloomer.

Nocturnum (*Night Blooming Jasmine*)—Flowers greenish white during summer; very fragrant at night.

CUPHEA—*Cigar Plant.*

*Eminens*—Growth erect; flowers scarlet, tipped yellow; profuse autumn bloomer. 10c. each, 75c. per 10.

Hyssopiphylla—A very neat miniature plant of dwarf habit, and with bright blue flowers, which are produced in great profusion. 10c. each, 75c. per 10.

Llave—See page 4.

Platycentra—A most profuse bloomer; flowers tubular, red, tipped black and white; very desirable plant. 10c. each, 75c. per 10, 86 per 100.

CARNATIONS.
Very valuable bedding plants, and continuous bloomers during summer and winter. Of these we offer 15 of the best standard sorts in all the shades of scarlet, rose, crimson, yellow striped, white, etc. Plants from 3-inch pots 15c. each, $1.25 per 10. Ready March 1st.

Datura—*Brugmansia Suavolens.*
A shrubby plant, growing to a height of 6 to 8 feet in rich ground; flowers white, very large, trumpet-shaped and fragrant; a most excellent plant for effect. 15c.

HELIOTROPE.
Universal favorite; flowers very fragrant; excellent for bedding out or for pot culture as winter bloomers; ten varieties, colors ranging from deep purple to pure white. 10c. each, 75c. per 10, $6 per 100.

HYDRANGEA.
Strong plants. 25c. each, $2 per 10.

Hortensis Group.
With Globeose Heads.
All require a shady, and where practicable, a rich and moist situation. The color is changeable according to soils, and varies from blue to rose color; all hardy.

Hortensia Variegata—With leaves beautifully blotched white; suitable for pot culture in shade.

Otaksa—An improved variety of Hortensia; flower heads very large; pale rose or blue, according to soil.
Ramis Pictis—A new variety, with dark purple stems and large heads of pale blue flowers, with lighter centre; excellent.

Rosea—Vigorous habit; flower heads shaped like those of Thomas Hogg, and as freely produced; color bright rosy red.

Thomas Hogg—Finest white flowering variety of this class.

Japanese Group.

Fimbriata—With fringed flowers; small plants only.

Japonica—Outer florets pale blue, inner dark blue.

Imperatrice Eugenie—Pale blue.

Stellata Prolifera—Outer florets pale rose, centre darker.

Japanese Group.

Paniculata Grandiflora—Produces immense panicles of pure white flowers, which last for several weeks.

*LANTANA.

10c. each, 75c. per 10, 21c. per 100.

Very desirable class of plants; continually in flower from May until frost; flowers generally of two colors; excellent bedding plants; fifteen varieties.

The great improvements in the newer varieties consist in their dwarf, compact habit, and increased flowering qualities.

LEONOTIS LEONURUS—Lion’s Tail.

Free blooming plant, with spikes of orange flowers. 15c. each, 50c. per 10.

*NIEREMBERGIA GRACILIS.

Profuse blooming plant, flowers pale blue. 10c. each, 50c. per 10.

PLUMBAGO.

Capensis—An excellent plant; almost continuous bloomer; flowers pale blue. 10c. each, 75c. per 10.

Capensis Alba—New; a white variety of above and of similar growth. 10c. each, 75c. per 10.

*Larpentheae—Dwarf; bright deep blue and continuous bloomer; fine for ribbons. 10c. each, 50c. per 10, 375c. per 100.

Rosea—Flowers pink. 15c. each.

Rosea Superba—New; flowers deep pink. 15c.

PYRETHRUM—Feverfew.

10c. each, 50c. per 10, 21c. per 100.

*Golden Feather—Foliage golden yellow; flowers single.

*PETUNIAS—Double.

10c. each, 75c. per 10, 21c. per 100.

Twelve best varieties, all colors; continuous bloomers.

The new varieties of last year are great acquisitions and wonderful improvements upon the older strains. Plants of the latest novelties will be ready March 1st.

*PINKS—Paisley.

10c. each, 75c. per 10.

Smaller than Carnations; flowers of various shades; clove-scented; four varieties.
SALVIA.
10c. each. 75c. per 10.

Splendens—Scarlet; best for bedding. $4 per 100.
Alba—White, sometimes striped red, or half white and half red.
Wm. Bedman—Of dwarf, compact habit; flowers scarlet. Desirable for pot culture.
Eriocalix—Purple and white; blooms in fall.

Marmorata—Dwarf; flowers white, spotted scarlet.
Mrs. Stevens—Flowers purple crimson.
Mrs. Mitchell—Purple.

*TRITOMA GRANDIFLORA.*
Very showy plant; flower spikes from 10 to 12 inches; deep orange and yellow; constant bloomers; perfectly hardy. 25c.

*VERBENA.*
10c. each. 50c. per 10. $4 per 100.

Our collection of this universal favorite is very select, and comprises all the best varieties of this and former years. Colors white, red, scarlet, crimson, blue, with all intermediate shades, variegated, spotted, etc.

CANNAS—Indian Shot.
Price, unless noted. 15c. each; 10 varieties our selection, for $1.

Plants combining broad foliage of various tints, with a profusion of flowers ranging in colors from crimson, orange to yellow and the intermediate shades. When planted in rich soil they make an admirable effect. The newer varieties are remarkable for the brilliancy and size of their flowers, many equaling the Gladiolii in this respect. They are most profuse and constant bloomers and cannot be too highly recommended. If plants are lifted from open ground before frost and potted, they make admirable additions to ornamental foliage plants for greenhouses.

Select varieties from introductions previous to 1893.

Antoine Crozy—Flowers large, deep crimson; foliage green. 4 feet.

Ehemani—Very distinct; foliage large like a banana; flowers very large, carmine red, produced on stems of great length that often produce a dozen flowers. 5 feet.

Enfant du Rhone—Deep orange red, washed cinnabar red; yellow centre; foliage green. 5 feet.

General de Negrter—Flowers in immense trusses of a bright crimson color overlaid with violet; foliage rich bronzy purple. 4 feet.

Glowing—Plant of compact habit, seldom more than 3 feet in height. Foliage dark green. Flowers very large, deep orange, in large trusses, and produced in great profusion.

Geoffroy St. Hillaire—Scarlet and orange, dark foliage. 4½ feet.

Jules Chretein—Foliage green; flowers large with long broad petals of a bright glowing cerise crimson. 3 feet.

Jacquemet Bonnefond—Foliage green with bronzy purple ribs and veins, flowers very large, rich orange scarlet. 3 feet.

Louis Chretein—Bright canary yellow, spotted with crimson; foliage light green. 4½ feet.

Mr. Lafortc—Flowers of large size, of a deep salmon, shaded brick red; foliage deep bronzy purple. 3 feet.

Madame Crozy—Habit of growth is vigorous and dwarf; foliage dark green. Flowers closely set on branching stems; orange crimson bordered with yellow. This variety is valuable either for bedding in masses as also for cut flowers, $1 per 10, $8 per 100.

Princess Lusignani—Bright glowing orange scarlet shaded crimson; foliage green. 3 feet. 25c.

Star of '91 or Thos. S. Ware—Orange scarlet, banded with yellow; foliage green. 3 feet. 25c.

Zwbrina—Foliage of immense size; green striped purple. 6 feet. Excellent for centre of beds of foliage plants. It is the tallest of the whole collection.
For many years past we have added annually to our collection the most promising of the new varieties until our present stock contains nothing but superior sorts. To grow every variety that is offered by the many growers would prove injudicious. We therefore select only the most distinct of the prize varieties as they appear, and thus keep our selection within reasonable bounds. To fully describe the peculiar shades and colors and the great variety of forms would not be possible within the limits of this Catalogue. While we keep several thousand plants in stock, it is impossible to always have a full supply of plants of every variety. We therefore make the following offer if the selection of varieties is left to us. We will in every instance include only the most distinct varieties.

CULTURAL DIRECTIONS.

If for open ground, plant in any good soil, well fertilized, and from end of March until June. If for winter blooming in the house, the plants should be lifted from the open ground during September, potted in eight or ten-inch pots, and removed to a cool greenhouse or kept well sheltered from the sun. Should very large flowers be desired, such as are seen at special exhibitions, all the buds but one upon each shoot should be pinched off as soon as they appear. This is termed “disbudding,” and enables the production of flowers of six or more inches in diameter. While such enormous flowers can be produced by this process, it must be borne in mind that by allowing the plant to perfect all the flowers which it produces, the latter will not average half the size of those produced by the “disbudding” process. Many varieties will remain in full bloom until Christmas if kept in a cool greenhouse, and few plants will afford as much pleasure and profusion of blooms.

BULBS.

AMARYLLIS.

Johnsonii—Crimson with white stripes; blooms during spring. Large flowering bulbs. 50c.

Reginae—Scarlet on green ground. Large bulbs. $1, medium 50c.

The above varieties are nearly hardy in this latitude, but for permanent open ground culture, a covering of leaves during winter is advisable.

If flowers are desirable for early spring, lift the bulbs after frost, allow these to dry off for a month or six weeks, then pot in 8-inch pots and bring in the greenhouse. They are most ornamental and valuable plants.
Equestre (Barbadoes Lily)—Flowers red with greenish white centre. Hardy here, but is also valuable for forcing. 25c. each.

Longiflora—Flowers white, striped pink; a profuse spring blooming variety and very hardy. Large bulbs 50c. Medium 25c.

**CALADlUM ESCULENTUM.**
*(Elephant’s Ear.)*
A most effective plant, with enormously large leaves. Excellent for groups upon lawns. Give an abundance of rich soil and water. Large bulbs 25c. each, $2 per 10. Medium $1 per 10.

Javanicum—Similar to above, but with deep purple stems. 25c. each, $2 per 10. Medium bulbs, $1 per 10.

**CRINUM.**
Hybrid of Crinum Capense—Umbels of 4 flowers, flesh with darker bands. Flower stalk 3 feet; is very hardy, and flowers are produced from early spring until frost. 50c.

Kirkii, or Nobile—Flowers 12 to 15 in an umbell. White with bright red stripe down the back. Leaves 3 to 4 feet long. A very showy plant, introduced from Zanzibar in 1879. 50c. Not hardy here.

Crinum Scabrum—Umbels of 8 to 10 flowers; light pink and purplish band; very fragrant; opens about 4 p. m., and remains in bloom until the following morning. Begins to bloom in July and lasts until frost. Requires a little protection during excessive cold weather. 50c. each.

**PANCRATIUM.**
Carribeum—Spider Lily—Flowers produced in clusters, pure white, fragrant and lasting a long time. Hardy south of Savannah, but should be potted in fall here. 25c.

**NERINE.**
Japonica or Lycoris Radiata—Flowers deep pink approaching to scarlet, with undulated divisions and fringed; hardy; The blooming period varies from April to May. 10c. each, 75c. per 10.

---

**COLORED FOLIAGE PLANTS.**

The introduction of variously-colored plants of great decorative effect and susceptibility of standing through our dryest summers has added much to the resources of our flower gardens. Most of these plants show to best advantage when planted *en masse*, ribbons or borders, bringing the different colors in pleasing contrast. The great advantages of these plants are that they retain their varied and brilliant colors when other favorite flowers cease to bloom. We grow these very extensively, and can supply the most desirable classes for massing or ribbon planting in quantities.

**ACALYPHA.**
Foliage mottled and blotched crimson and scarlet; fine bedding plant; three varieties. 15c. each, $1 per 10.

**ACHYRANTHUS.**
Plants of great value for massing or ribbon borders; brilliant foliage. 10c. each, 50c. per 10, 84 per 100.

Acuminata—Violet crimson foliage; robust grower.

Casei—Habit of Acuminata; leaves gold, green and crimson.

Collinsii—Dwarf and compact grower; stems pink; leaves yellow, pink and green.

Lindenii—Foliage deep blood red, veined lighter; most distinct and valuable.

Verschaffeltii—Bright violet crimson.

Biemulleri—Violet crimson; very bright. Dwarf.

Wallacei—Foliage smaller than Verschaffeltii; dark crimson.

Emersonii—Maroon.
ALTHERMANATHERA.
Dwarf; bushy habit; growth from six to twelve inches; foliage purple, yellow, pink, etc.; especially effective for ribbon borders. 50c. per 10, $4 per 100.
Aurantiaca—Brown, red and yellow.
Aurea Nana—Golden yellow.
Cecilis Amœna—Yellow and crimson; foliage broad.
Paronychioides.
Rosea Nana.

ABUTILON ECLIPSE.
Leaves finely mottled gold; stands our driest weather to perfection; best of its color. 80c. per 10.

AGERATUM.
Variegatum—Leaves beautifully variegated white, and produce a profusion of pale blue flowers; very desirable. 50c. per 10, $4 per 100.

BASELA VARIEGATA.
A shrubby species of Madeira Vine; leaves finely variegated. 10c. each, 75c. per 10.

*CINERARIA.
Maritima ("Dusty Miller")—Foliage silvery white; fine plant for ribbon borders. 10c. each, 75c. per 10, $6 per 100.

FEVERFEW—Golden Feather.
Golden foliage. 50c. per 10, $4 per 100.

STEVIA VARIEGATA.
Foliage finely variegated white; a valuable plant for ribbons. 50c. per 10, $4 per 100

COLEUS.
A CLASS well entitled to the first position as Ornamental Foliage Plants. The colors vary from the deepest crimson to maroon, bronze, golden yellow, with various colored markings; very thrifty, and indispensable in flower gardens, whether as single plants or massing in groups; should not be sent until the middle of April, as they are susceptible of being injured by cold weather. Our collection embraces all the best varieties, selected from the annual introductions of the past ten years.

Varieties marked with an asterisk (*) were all obtained in our grounds and selected from a bed of nearly one thousand seedlings from selected strains. We have no hesitation in saying that they are unsurpassed by any previously introduced varieties.

BEDDING SORTS.
Price 10c. each, 50c. per 10, $4 per 100, after April 15.
Aurea Marginata—Crimson, yellow edge.
Beacon—Dark purple.
*Conqueror—Rich garnet with maroon.
*Golconda—Very dwarf; bright yellow; serrated leaf; compact form.
Golden Bedder—Bright yellow.
J. Goode—Yellow; serrated leaf.
Negre or Othello—Blackish purple.
Ritta Kirkpatrick—Centre pale yellow, green edge.
*Red Bird—Dwarf, compact habit, and for years past proved one of the brightest for bedding; leaves deeply serrated, vivid crimson and brown.
Serrata—Maroon; golden edge, deeply serrated.
Verschaffeltii—Velvety brown crimson.

Fancy Sorts, for Single Specimens, or Growing in Pots.
*Annie—Dwarf and compact habit; yellow centre, margin red, deep yellow and black.
*Clarence—A very distinct sport of Coleus Progress; foliage green and yellow; excellent.
Exquisite—Violet carmine; green edge.
*Firebrand—Crimson and green edge.
Firecrest—Crimson centre, lighter edge.
Harlequin—Mottled and spotted yellow, red and green.
Nonesuch—Crimson; gold edge.
*Omnicolor—Erect growth; red, yellow, green, brown, black.
Prest. Garfield—Purple and red.
Progress—Spotted yellow, red; crimson and green; very distinct.

Plants for Massing or Ribbon Lines can be supplied in large quantities at low rates. Send list of varieties and number desired, stating purpose to be accomplished and we will give estimates.
ORNAMENTAL GRASSES.

ALL HARDY IN THIS LATITUDE.

Gynerium Argenteum—A most ornamental plant, with silvery plume-like spikes of flowers; very hardy, and thrives in any ordinary rich soil. 25c.

Gynerium Roseum, or Rose-Colored—Among a large quantity of seedlings we found several plants producing flowers of a light rose and a light purplish color. The plumes are also very large and silky. When just appearing they are of a purple tint; this gradually fades until a soft rose tint is retained. Plants are all propagated by division. 25c.

Gynerium Purpureum, or Purple-Colored—Another seedling of very robust habit, and producing plumes of great length and substance, of a light purple tint. 25c. each.

Gynerium Elegans—Plumes silvery white, produced upon very long stems; blooms early; a graceful new variety. 25c.

Gynerium Aureo Linearis—Foliage beautifully lined with gold, of compact and dwarf habit. 25c.

Gynerium Roi des Roses—Plumes very compact, of a delicate rose color; very free blooming and compact growing; new variety. 25c.

ERIANTHUS RAVENÆ.

Attains a height of ten to twelve feet, throwing up numerous flower spikes of grayish white; blooms profusely, and remains in bloom a long time; needs space to show its merits. 25c.

EULALIA.

Japonica Variegata—A new variegated hardy grass from Japan. In appearance it somewhat resembles the Ribbon Grass while in a young state. It forms compact clumps six feet in diameter. Its flower stalks are very graceful and numerous, and after several years trial in our grounds we highly commend it as a very ornamental grass. 25c.

Japonica Zebrina—Similar in habit to above, but with its leaves blotched with gold. The stripe, instead of running longitudinally like the former, runs across the leaf. 25c.

Univitata—With narrow foliage and a narrow stripe running the entire leaf. 25c.

PAMPAS GRASS.

EULALIA ZEBRINA.

PAMPAS GRASS.
CLIMBERS.

Those marked with an asterisk (*) are hardy; the others are for house culture. Those marked with a dagger (†) are good for open ground in summer.

*AKEBIA QUINNATA.
Of rapid growth; flowers of deep maroon in early spring; evergreen. 25c.

AMELOPSIS.
*Veitchii—A Japanese climber of rapid growth; excellent for covering walls. 15c. each, $1 per 10.
*Tricolor—With variegated leaves; good for trellis. 15c.
*Muralis; Rapid climbers of recent Royalli; introduction. 15c. each.
†ALLAMANDA HENDERSONII.
Beautiful large yellow flowers, free-bloomer. 25c.
†ANTIGONON LEPTOPUS.
Rapid grower, with racemes of rose-colored flowers in summer. 25c.

†ARISTOLOCHIA ELEGANS.
One of the best summer climbers; of rapid and dense growth. It bears profusely, even on small plants, has handsome and elegant flowers of a rich dark purple color, ornamented throughout with irregular branched markings of a creamy white, and having a golden yellow eye surrounded by rich velvety purple. Planis, 3-inch pots, 25c.

BIGNONIA.
Argyreo-Violacea—Foliage green veined white, underside purple; a showy climber. 25c.
Magnifica—Flowers varying from delicate mauve to purplish crimson; very large; blooms in summer; a very handsome species of recent introduction. 50c.
Venusta—Rich orange; winter blooming for conservatory; is a most desirable variety for Florida, where it produces a wealth of brilliant flowers during winter. 25c.

CAMPSIDIUM FILICIFOLIUM.
Of rapid growth; leaves fern-like. 25c.
†CISSUS DISCOLOR.
Foliage beautiful crimson, white and green; stems die in winter unless kept under high temperature. 25c.

CLERODENDRON BALFOURII.
A plant of exquisite appearance; flowers bright scarlet, encased in a pure white bag-like calyx; very desirable. 25c.

DIPLADENIA UROPHYLLA.
Flowers pink, with yellow; a good house climber. 25c.

ECHITES PICTA.
Foliage veined white; requires much heat. 25c.

MOON FLOWER.

FICUS REPENS.
Evergreen; excellent for walls, rock work or for covering rustic work in greenhouse. 15c.

HOYA, OR WAX PLANT.
Carnosa—A popular plant. 25c.

IPOMEA LEARI.
IPOMEA.

†Macrantholeucum, or Moon Flower—
A rapid climber, with very large, pure white flowers, which open in the evening and last all night; a valuable plant for verandas or arbors. 15c.

†Selowii—Flowers pink, convolvulus shaped; roots tuberous, perennial; very desirable. 15c.

†Learii—Flowers bright blue, with red-dish rays and very large; a most conspicuous and valuable variety. 15c.

IVY—Hedera.

†Algerian—With very broad leaves; evergreen. 15c.

†Aurantiaca—With smaller foliage, and producing scarlet berries. 15c.

†Irish—Evergreen, a well known plant. 15c.

JASMINE DOUBLE CAROLINA.

(Gelsemium.)

A variety of the native species with double flowers. A profuse bloomer, and very desirable. 25c., $2 per 10.

JASMINUM.

†Catalonian—Flowers white; very fragrant. 15c.

LYGODIUM SCANDENS.

Japanese climbing fern; a graceful climber for greenhouse culture. 25c.

*MANETTIA CORDATA.

Produces innumerable scarlet tubular flowers; constant bloomer; roots perennial; excellent for trellis. 15c.

MYRSOPHYLLUM ASPARAGOIDES.

(Boston Smilax.)

Indispensable for winter decorating; excellent. 10c.

PASSIFLORA.

†Arc-en-Ciel—Flowers large; centre white and citron-colored, with outer circle dark; a rapid grower; new; an excellent plant. 25c.

*Constance Elliott—Similar to the above in growth, but flowers pure white. 25c.

Decaisneana—Blue and red; very fragrant; flowers very large. 25c.

Kermesina—Crimson. 25c.

PAULINEA THALICTROIDES.

A greenhouse climber, with fern-like foliage of golden shade. 25c.

‡RHYNOCOSPERMUM.

*Jasminoides (African Jasmine)—Evergreen with white fragrant flowers in April and May; a valuable, hardy climber. 25c.

*Variegatum—With variegated leaves. 25c.

SOLANUM AZUREUM. (See page 4.)

A beautiful new climber with branches of delicate blue flowers and scarlet berries. Excellent for greenhouse. 25c.

SOLANUM.

*Jasminoides (Potato Vine)—Flowers white; very desirable for outdoor culture. 15c.

Jasminoides Grandiflorum—A new variety of more bushy habit; flowers larger and produced in numerous large racemes. 15c.

SENECIO SCANDENS.

German, or Parlor Ivy—Desirable for trellis work. 10c.

Macroglossis—New, with foliage resembling English Ivy.

†SOLLYA HETEROPHYLLA.

A medium growing climber, with bell-shaped flowers of a bright blue color; nearly hardy. 25c.

†STIGMAPHYLLUM CILIATUM.

Flowers canary yellow, of rapid growth and good bloomer. 25c.

†TACSONIA LEVIS.

Crimson; most profuse bloomer; excellent for outdoor culture in summer; resembles Passion Flower. 25c.
TACSONIA VAN VOLXEMI.
Flowers scarlet, very showy; one of the finest greenhouse climbers. Blooms late in summer. 25c.

THUNBERGIA FRAGRANS.
Flowers white; profuse bloomer. 25c.

TECOMA JASMINOIDES.
Flowers white, with carmine centre; a fine house plant. 25c.

VANILLA AROMATICA.
The true Vanilla Plant; requires a very warm greenhouse. 50c. to $1 each.

GERANIUMS.

ZONALE, or HORSE SHOE, Single and Double.

INDISPENSABLE in any collection of plants, whether for house culture or bedding out, for which purpose they are admirably adapted. For bedding out, we would recommend the solid darker shades. The light colored and occluded varieties are best adapted for pot culture.

We do not give a list of varieties, because short descriptions will not convey a correct idea of their individual merits. Our collection has been very carefully selected from several hundred sorts, and all those we have retained are the cream of the old standard sorts and of the newer introductions. The flowers include all the shades of scarlet, crimson, lilac, pink, salmon, white and striped. 10c. each, 80c. per 10, $6 per 100.

SCENTED—Apple, Citron, Pennyroyal, Attar of Rose. Price 10c. each, 80c. per 10.

TRICOLOR, SILVER AND GOLD-LEAVED—Very handsome classes, each comprising many exquisite varieties. Leaves are finely tinted or marked with silver, gold, bronze, carmine, with light margins or dark zones. Fine for pot culture, but unfit for bedding purposes. Most varieties shed their leaves in summer. Six varieties. 15c. each, $1.25 per 10.

IVY-LEAVED, SINGLE AND DOUBLE—Nearly all of trailing habit and well suited for hanging baskets or to be trained on trellis. Flowers vary from pure white to lilac, pink and crimson. Twelve varieties. Pink, carmine, white, etc. Price 10c. each, $1 per 10.
This class is intended to be cultivated under glass or in the house, although several varieties are effective Bedding Plants. Those prefixed * are desirable Winter Bloomers.

**SPECIAL COLLECTIONS.**

For the convenience of patrons not thoroughly familiar with the most desirable plants for furnishing greenhouses, we will make up the following collections. All the plants will be distinct and of the most desirable classes and varieties, the selection to be left to us.

*ABUTILON.*

Vigorous growing plants, almost perpetual bloomers; flowers bell-shaped. 10c. (See under head of bedding plants.)

**ACACIA.**

A genus of medium sized trees, most desirable for the elegance of their foliage and the profusion of their bloom, which are produced during winter and early spring. Some varieties will withstand several degrees of frost, but all are hardy where the Banana will thrive. Plants from 3-inch pots, 25c.

*ADAMEA VERSICOLOR.*

Panicles of white and lilac tinted flowers. 25c.

*ESCHINANTHUS.*

Boschianus—Flowers orange and red, of trailing habit. Should be grown on blocks of wood like Orchids. 25c.

Zebrina—Leaves striped. 25c.

**AGAPANTHUS.**

Umbellatus, or *African Lily*—Flowers blue, almost hardy in this latitude. 50c.

**ALLAMANDA.**

Cathartica—Shrubby plant; flowers yellow; profuse bloomer. 25c.

*Hendersonii—Flowers golden yellow; a beautiful climber; almost perpetual bloomer. 25c.*

**ALOCASIA MACORRHIZA VARIEGATA.**

Leaves similar to Caladium Escentum, but beautifully blotched white. 50c. to $1.

*ANGELONIA GRANDIFLORA.*

An old plant, not sufficiently appreciated; flowers deep blue, free bloomer; good bedder. 15c.
ARALIA.
Filicifolia—A good decorative plant with finely cut foliage of a glossy green; stems spotted purple. 50c. and $1.
Guilfoylii—Foliage broad, green bordered white. $1.
Papyrifera—A very showy greenhouse shrub; leaves large, very downy. 50c.

ASPARAGUS TENUISSIMUS.

ASPARAGUS PLUMOSUS NANA,
A most graceful plant. Branches slender and arching. Foliage is finer than the most delicate ferns; is of a bright and very pleasing green. 50c.

ASPARAGUS TENUISSIMUS.

BEGONIAS.

ASPIDISTRA ELATIOR VARIEGATA.

ASPIDISTRA ELATIOR VARIEGATA
Leaves broad, glossy green, striped white; an excellent and showy plant. 25c.
HYBRID REX.

Succulent soft-wooded plants of great beauty; indispensable in any greenhouse; foliage beautifully marked with various colors and shades; require sandy leaf mould, plenty of pot room and shade. Twenty varieties, from 3-inch pots. 25c. each. $2 per 10.

WINTER BLOOMING VARIETIES.

All of easy culture and desirable plants. 15c. each, $1.25 per 10.

Alba Picta—Leaves spotted white; flowers white.
Bruantii—Flesh.
Fuchsiodes—Flowers red.
Glaucophyllum—A trailing variety, fine for baskets; flowers orange red.
Leptophylla—Stemless; leaf stalks hairy; leaves unevenly cut; flowers pink.
Margarita—Foliage bronze; flowers rose color.

BEGONIA ARGENTEA GUTATA.

Metallica—Flowers white; foliage mottled.
Multiflora Hybrida—Flowers pink.
Palmata—Leaves palmated.
Rubra—Flowers red; very large.
Saundersii—Flowers crimson scarlet.
Sutton's White Perfection—Flowers white; free bloomer.
Subpeltata—Leaves reddish bronze.

Washingtoniana—Flowers pale pink.
Weltoniensis—Flowers pink.

BEGONIAS OF VARIOUS SPECIES.

Price 15c. each, $1.25 per 10.

Argentea Gutata—Leaves bronze, with silvery blotches and white flowers.
Clementina—Bronze green, with large silver spots.
Compta—Leaves long, satiny green, with silver tinge; foot stalks pink.
Decora—Leaves blotched silver.
Diadema—Leaves olive green, spotted silver; deeply lobed.
Dr. Nachtigal—Leaves green; flowers rosy scarlet in winter, and with violet fragrance.
M. De Lesseps—An improved form of Argentea Gutata.
Rubella—Of the Ricinifolia class; leaves blotched red, with purplish ribs.
Speculata—Leaves in form of grape leaf; flowers pink.
Teuscherii—Leaves olive green, blotched gray; flowers red.

BEGONIA GILSONII.

Robust grower; leaves broad; flowers white; double; a distinct and excellent variety. 25c.

BEGONIA SEMPERFLORENS.

Gigantea Rosea—Strong upright grower; leaves smooth and glossy; flowers clear red, and borne upon strong, thick stems; very floriferous. 25c.

BEGONIA MANICATA AUREA.

With beautiful golden tinted leaves. 25c. each.
BELOPERONA OBLONGATA.
Profuse bloomer from October until spring; flowers crimson. 15c.

BEHMERIA ARGENTEA.
A highly ornamental plant; leaves very large, with silvery surface. 50c.

BRYOPHYLLUM CALYCI NUM.
A succulent, of rapid growth; flowers green, in form of bladders. 15c.

CALLA.
Æthiopica—Lily of the Nile—White trumpet-shaped flowers. 25c. and 50c.
The Gem—See list of novelties. 25c.
Alba Maculata, or Richardia—With beautiful spotted leaves; flowers shaped like those of the Calla; pure white; bulbs green and red; winter bloomers for conservatory.

BEGONIA DIADEMA.
Rosea, Floribunda, Grandiflora, 15c.

CASUARINA.
Beefwood of Australia.
Very graceful greenhouse tree. Foliage feathery and thread like. Valuable for decorative purposes. 25c.; larger specimens 50c. to $1. Two varieties.

BEGONIA MANICATA AUREA.
need to be kept dry and free from frost during the winter. 25c.

CAMPYLOBOTHrys.
Handsome foliage plants; require as shady place in greenhouse and much heat in winter.
Assamica—Foliage green with bronze tint. 50c.
Discolor—Leaves dark brownish red and green, of low growth. 25c.

CENTRADENIA.
Dwarf; soft-wooded plants; foliage dark RICHARDIA MACULATA, OR SPOTTED CALLA
Plants 1 year from graft, 8 to 10 inches high, 50c. each; $4 per 10. We have a few 2-year old plants from graft, 12 to 15 inches high, well formed, at 50c each.

All our plants are pot-grown, and grafted upon the Otaheiti and Limonium Trifoliatum, which dwarfs the tree in the same manner that Paradise stock dwarfs the apple. These plants are thus better adapted for growing in conservatories than those grafted upon the ordinary seedling stock. This class of trees commends itself to amateurs, but it is not intended for cultivating in groves.

We cannot too highly recommend these dwarf Orange trees. They begin to yield fruit when 3 years old, and are very desirable for growing in tubs or city gardens where space is limited.

Produced in great profusion; a very desirable ornamental plant. 25c. Larger plants from 50c. to $1.

**Orange Myrtle-leaved**—With very small leaves, and compact growth. Produces edible fruit of small size. A desirable conservatory plant. 50c. and $1.

**CLERODENDRON.**

*Balfourii*—A climbing plant, but can be grown as a bush by keeping it slightly pot bound; flowers bright scarlet, encased in a bag-like calyx of pure white color; an exquisite plant, drops its foliage in winter. 25c.

*Speciosum*—Similar in habit to Balfourii, but with darker colored calyx. 25c.

**COCOLABA PLATYCLADA.**

Flat stems; a curious plant for ferneries; good bedder. 25c.

**COFFEA ARABICA.**

The Coffee Tree; an evergreen shrub with glossy leaves and white fragrant flowers. 25c.

**CORDYLINE AUSTRALIS.**

A green-leaved variety of the Dracaena tribe. 25c., larger 50c.

**CORDYLINE INDIVISA.**

Long foliage, graceful, well adapted for vases. 25c.
CROTONS.

Plants with beautiful leaf variegations; indispensable in any collection of hot-house plants; require high temperature in winter, and should be bedded out in a shady place during summer, the pots plunged in the earth to the rim.

We offer a superb collection of forty varieties, among which are the following: ANDREA-NUM, CHELSOONI, CORNUTUM, D'IsraelI, ELEGANTISSIMA, HOOKERIANUM, IRREGULARE, INTERRUPTUM, KATONI, MACARTHURI, MACULATUM, MAXIMUM, MULTICOLOR, MAJESTICUM, NOBILE, PICTUM, QUEEN VICTORIA, REGINA, SPIRALE, SALICIFOLIUM, UN- DULATUM, VARIEGATA, VOLUMUTUM, etc., etc. Prices from 3-inch pots, 25c.; from 4 and 5-inch pots, 50c. and $1. Ten varieties, our selection, from 3-inch pots, $2; ten varieties, our selection, from 4 and 5-inch pots, $4.

CHRYSANTHEMUM FRU-TESCENS—Paris Daisy.

Free winter-blooming plants; flowers white, yellow centre; two varieties. 10c. each, 75c. per 10.

CROTON MACULATUM.

CINNAMOMUM CAMPHORA.

(The Camphor Tree.)

This tree is hardy where the orange thrives. It is valuable as an ornamental evergreen shade tree as well as for the camphor gum which it produces. It is of rapid growth and makes a good conservatory plant. One year plants from 3-inch pots 25c., $2 per 10, $15 per 100. Larger sizes 50c. to $1.

CINNAMOMUM ZEYLANICA.

(The true Cinnamon Tree.)

A broad-leaved evergreen shrub producing the cinnamon bark of commerce. Plants 18 inches high 50c.

CURCULIGO RECURVATA.

A palm-like plant, with long leaves; very ornamental for conservatories. 25c., large 50c.

CURCULIGO RECURVATA VARIE-GATA.

A beautiful sub-variety of above, with leaves striped with white. 50c., larger plants $1.
large size; foliage colored in many varieties.

**Fragrans**—Broad green leaves, flowers very fragrant; a desirable variety of easy culture. 25c. to $1; a few very large specimens $3 each.

---

**CYCLAMEN PERSICUM.**

A low growing bulbous winter bloomer; flowers bell-shaped, nodding; colors white and pink. 20c., $1.50 per 10.

**DASYLIRION QUADRANGULARIS.**

Excellent plant for sub-tropical gardening and decorative purposes. Leaves linear, gracefully drooping, flowers white in panicles. Plants require four to five years of growth before flowering. 50c.

**DIPTERACANTHUS AFFINIS.**

Flowers red; free bloomer. 25c.

**DRACENA—Dragon Tree.**

Handsome ornamental plants, attaining

---

**Goldeana**—Leaves banded with green and silver grey; very fine. 50c. to $1.

**Imperialis**—Of rapid growth and colors handsomely. 50c. to $1.

**Terminalis**—Bronzy green, flaked crimson. 50c. to $1.

**Terminalis Stricta**—With dark red leaves, flaked crimson. 50c.

**DURANTA PLUMIERI.**

Tall-growing conservatory shrub; flowers blue, succeeded by yellow berries, which are retained all winter. 25c.

**ERANTHEMUM MARGINALUM.**

Shrubby plant, with leaves margined white. 25 and 50c.

**EUCHARIS AMAZONICA.**

_Amazonian Lilly._

Bulbous plants, with white fragrant flowers. Most valuable winter-blooming plant; requires rich loam and ample drainage. Give liquid manure while in growth and a rest of six weeks in fall. Several bulbs may be planted in a shallow tub and do not require repotting unless bulbs are crowded. Top dress the soil twice a year. 25 and 50c.
EUGENIA—(Rose Apple.)

Jambos—An evergreen shrub; flowers in large globular, brush-like heads, succeeded by white fruit, with a strong Attar of Rose perfume. 25c., large 50c.

Ugni—Chilian myrtle; hard wood evergreen shrub, with small foliage; flowers white or pale pink; fruit aromatic. 50c.

EUPATORIUM.

Winter blooming plants, flowers white, like a Stevia. 15c. Two varieties.

EUPHORBIA.

* Splendens—A thorny shrub, with bright red flowers; continuous bloomer. 25c.

Sanguinea—Foliage brown crimson, veined carmine; fine bedder. 25c.

* Jacquiniaeflora—Flowers bright orange; fine winter bloomer. 25c.

EUPHORBIA SPLENDENS.

FICUS.

Elastica—Indian Rubber Tree, with very showy and broad leaves. 50c. to $1.

Australis—Australian Gum Tree; foliage smaller. 50c. to $1.

Repens—A creeping plant, valuable for covering pillars, walls or rock work in conservatories. 15c.

Parcelli—A white variegated leaved plant; rapid grower. 50c.

FICUS ELASTICA.

GROUP OF FUCHSIAS.

* FUCHSIA—Ladies’ Ear Drops.

A very popular class of plants where they succeed. Our protracted summers are unfavorable to their growth, and but few varieties will stand the hot weather here. Valuable for the mountain regions of Georgia and North Carolina, where they succeed admirably. In this section it is advisable to cut the plants back to naked stems after the blooming period is over. Keep plants in a cool, shady place during the summer, and repot in September. Twelve varieties, single and double. 15c. each, $1.25 per 10.

FITTONIA.

Verschaffeltii—Low growing plant, with leaves exquisitely veined; deep pink; a perfect gem for greenhouse. 25c.

*FRANCISCEA.

Eximia—A shrubby plant, with flowers opening pale blue and turning white; very fragrant and profuse bloomer. 25 and 50c.
**GARDENIA CITRIODORA.**
A dwarf, shrubby plant, producing numerous small white flowers in early spring or winter as fragrant as Orange Blossoms. 25c.

**GREVILLEA ROBUSTA, or AUSTRALIAN SILK TREE.**
A tall tree; fine pinnate foliage; flowers orange yellow. The fern-like leaves make this a graceful and valuable plant for decorative purposes. In Florida it is highly valued as a shade tree of wonderful beauty, and has been given the name of "Australian Oak," a decided misnomer. 25c.; larger sizes 50c.

**GYNURA AURANTIACA.**
A new handsome plant, with leaves of violet tint. 15c.

**HABROTHAMNUS ELEGANS.**
Flowers tubular, carmine, of easy culture; constant bloomer. 15c.

**HETEROCENTRON.**
Good winter bloomer. Alba—white; Rosea—pink. 15c.

**HIBISCUS SINENSIS.**
(Chinese Hibiscus.)
Magnificent plants for bedding or pot culture. From 3-inch pots 25c., $2 per 10; from 4-inch pots, 50c., $4 per 10. Twelve varieties, including single and double.

**HIBISCUS** can be bedded in open ground during April and again potted off in October. Their flowers are produced continuously during summer.

**IMMANTOPHYLLUM MINIATUM.**
An amaryllidaceous plant, with rich salmon or light flame-colored flowers; blooms in spring. 50c. to $1.

**IMPATIENS SULTANI.**
A new plant, resembling somewhat a Balsam in habit of growth; flowers carmine magenta; very free bloomer. 15c.
Alba—White flowering. 15c.
Lucy—Lilac. 15c.

**IXORA.**
Free-blooming greenhouse shrubs.
Coccinea—Flowers orange red, in umbels. 50c.

**JACARANDA MIMOSCEFOLIA.**
A greenhouse tree, with leaves resembling an Accacia. Flowers blue in large panicles in spring; a showy plant, but requires to be 3 to 4 years old before blooming. 50c.
JASMINUM.
Fragrant flowering shrubs.

*Sambac (Arabian Jasmine)—Flowers white; very profuse bloomer. 25c.; large plants 50c.

Grand Duke of Tuscany—Very double; white. 25 and 50c.

Grandiflorum (Catalonian Jasmine)—15c.

Gracillimum or J. Multiiflorum (Star Jasmine)—Flowers white, star-shaped. 25c.

*JUSTICIA.
Desirable winter blooming plants. 15c.; $1.25 per 10.

Carnea—Pink.

Nervosa—Blue.

Ornata (Alphelamdra)—Leaves marbled white.

Bicolor—Flowers white, with purple blotch.

*LIBONIA PENRHOSIENSIS.
A desirable greenhouse shrub; flowers orange and scarlet; free winter bloomer. 15c.

LINUM TRIGYNUM (Yellow Flax.)
A valuable old plant, producing a profusion of brilliant yellow flowers in winter. 15c.

LOPEZIA.

Rosea—Flowers pink; very neat; winter bloomer. 15c., $1 per 10.

Alba—Flowers white; winter bloomer. 15c.

MAKEYA BELLA.
Of shrubby habit; flowers blue. 25c.

MARANTA.
Handsome foliage plants, with various colored leaves.

Discolor—Leaves deep green, under surface purple. 25 to 50c.

Massangeana—Leaves handsomely marked white, green and deep purple. 25c.

MELASTOMA ELEGANS.
Beautiful hot-house plant; winter bloomer; flower purple. 25 and 50c.

MEYENIA ERECTA.
Corulea—A large shrub, flowers large, of intense violet, with rich orange throat. Almost perpetual bloomer, and in Middle Florida attains a height of 10 to 15 feet. A most striking and beautiful plant. 25c.; large size 50c.

Alba—Flowers white. 25c.

MURRAYA EXOTICA.
A rare shrub of the Orange tribe; flowers white; very fragrant. 25 and 50c.

MUSA—Bananas.

Hart’s Choice—Medium growing plant; fruit of Fig Banana class; bunches large; an excellent variety. 50c. to $1.

Sinensis, or Cavendishii—Of dwarf growth; produces very good fruit. Plants seldom grow above 6 feet. 25 to 50c.

Daca—Of medium height; fruit small, but of excellent quality. 50c. and $1.

Silk—Delicate foliage, underside leaves of a silky gloss. 50c. and $1.

Zebrina—A dwarf ornamental variety; underside of leaves purple, upperside green, striped purple. 50c.

Baracoa, or All good fruit bearing varieties of medium height. Magnifica †50c. to $1.

All the above are exceedingly ornamental. Should be planted in open ground in April and taken up in October, all leaves cut off and kept dry in a small box of earth, either in a greenhouse or cellar, and bedded out in rich ground early in spring, when fruit may be expected during the summer.

MUSA ENSETE.
The Abyssinian Banana—Leaves erect, very broad and with a crimson midrib. The most conspicuous variety of the genus. Exceedingly ornamental. 50c. each; large plants $1.50.

ABYSSINIAN BANANA.

MUSCENDA FRONDOSA.
Produces small yellow flowers which are surrounded by pure white bracts. 15c.

†NEMATHANTUS LONGIPES.
Of shrubby growth; flowers axillary, long; orange crimson; blooms a long time. 15c.

NERIUM—Oleander.
From 3-inch pots 25c. each; $2 per 10.

Cardinal—Dark red, semi-double.
Single White—One of the most valuable of the genus. Flowers pure white, produced in great profusion, and during nearly the whole summer. Plant of more hardy constitution and stands more cold than the double sorts.

Splendens—Old double pink, best of its color.

Newer Varieties, with Double and Treble Corollas.

The flowers differ in shape from the above in having two or three funnel-shaped corollas inserted one within the other. The great advantage of these varieties consists in the flowers falling off when passed through their freshness, and thus relieve the plant from unsightly dried flowers, as in the other varieties.

Colors range from pale rose to lilac or deep carmine; six distinct varieties.

Neriums are not hardy in this latitude unless planted in exceptionally favorable situations. Plants should be either grown in tubs or lifted from open ground before very cold weather.

**OPHIPOGON.**

Spicatus Aureus—A yellow variegated plant, with blue flowers, followed by bright blue berries, which are retained all winter. 25c.

Japonicus Var—Leaves with silver fines; flowers white. 25c.

**PERISTROPHE ANGUSTIFOLIA.**

Variegated leaves; suitable for rock work. 10c. each, 75c. per 100.

**PEPEROMIA MACULATA.**

A low growing plant, with foliage mottled white. 25c.

**PILEA MUSCOSA—Artillery Plant.**

Exceedingly curious; flowers very small, emitting a puff of smoke on opening. 15c. each, 75c. per 10.

**PHORMIUM TENAX—New Zealand Flax.**

Leaves broad, erect, sword-like; a popular ornamental plant for vases or tubs. 50c.

**PHYLANTHUS ROSEA PICTUS.**

A very striking plant; leaves colored with rose, bronze, green and white; beds out and stands the sun well. 50c.

**PITCAIRNIA.**

Beautiful hot-house plants; remaining in bloom a long time; flowers in spikes, with bracts of different colors. 50c.; larger $1 to $2.

Fulva—Flowers white, bracts yellow.

Graminefolia—Red and yellow; dwarf. 25c.

Splendens—Flowers red, bracts deeper red.

**pleroma benthamiana—Lasiandra.**

Flowers purple; winter bloomer. 25c.

**plumbago.**

Capensis—An excellent plant; almost a continuous bloomer; flowers light blue; a fine bedding plant, and for winter decoration. 10c.

Capensis White—A new sub-variety of above. 10c.

Rosea—Flowers pink. 15c.; large plants 25c.

Coccinea Superba—Deep pink. 15c.; large plants 25c.

**pine apple.**

Red Spanish, or Cayenne—Fruit large; leaves nearly devoid of spines. 50c. each.

**bromelia ananas—pineapple.**

Sugar Loaf—Fruit large, very sweet. One year old plants 50c., bearing size $1.

**egyptian queen, queen.**

Black Prince,

Porto Rico,

White Antigua,

All excellent varieties and now extensively cultivated in South Florida. Medium sized plants, 50c.; large plants $1.

Pine Apples may be grown with comparative ease in almost any greenhouse. The plants need frequent repottings the first year, and must be kept in continual growth.
• Poinsettia.
Pulcherrima—Tall growing plants; valuable for decorative purposes in winter; leaves preceding the insignificant flowers are bright crimson; requires high temperature in winter to bring it to perfection. 25 to 50c.

PSIDIUM (Guava.)
Red Catleya Guava (Psidium Catleyanum)—An evergreen shrub, producing the well known Red Guava. Produces fruit in an ordinary greenhouse. 25c., $2 per 10, $15 per 100.

GUAVA—RED CATLEY.

Winter Guava (Psidium Pupiferum)—Attains a height of six to eight feet; fruit very large; matures in fall and winter. Several distinct varieties. 25c.; large plants 50c.

Phrynium variegatum.
A showy new plant, with leaves beautifully variegated with light yellow; requires shade to prevent sun scald. Give a compost of garden soil, leaf mould, broken charcoal and sphagnum moss and ample drainage. 50c. and $1.

Ravenala madagascariensis.
The Traveller's Tree.
A conspicuous plant. Leaves very large upon stems of great length, giving this plant a remarkable appearance. Requires high temperature in winter. Large plants $1.

• Rhoddea.
Falcata (Orothium Japonicum)—A broad-leaved plant, with compact spikes of white flowers, followed with large red berries, which are retained all winter. 25 to 50c.

• Rogiera.
Cordata—Winter blooming shrub; flowers pink. 25 to 50c.

• Rondoletia.
Anomale—Profuse flowering plant; flowers scarlet. 15c.
Speciosa major—A shrubby plant; flowers orange. 50c.

• Ruellia.
Anisophylla—Flowers light lilac; good winter bloomer. 15c.
Formosa—Flowers deep scarlet; perpetual bloomer. 15c.

Russellia juncea.
Foliage resembling the Bulrush; flowers scarlet; very neat and desirable; excellent for vases. 15c.

Sanchezia nobilis variegata.
Leaves twelve inches long, of intense green, veined with golden yellow; one of the finest ornamental house plants. 25c. and 50c.
Sanchezia glaucophylla—With leaves of a glaucous green, striped with pale yellow. 25 and 50c.

Sansevieria zeylanica.
Sword-like leaves; green, marbled with lighter shade. 25 and 50c.

Sansevieria zeylanica.

Sansevieria zeylanica.

Sansevieria zeylanica.

Saxifraga.
(Strawberry Geranium.)
Low growing plants; suitable for rocks or baskets; leaves quite ornamental.
Tomentosa—10c., 75c. per 10.

Scutellaria.
Flowers in terminal spikes; blooms during spring; fine for house culture.
Pulchella—Rosy purple. 15c.
Mocciniana—Scarlet; a magnificent plant. 15c.
SOLANDRA GRANDIFLORA.
A greenhouse shrub, producing large pale yellow or cream colored trumpet shaped flowers. To produce an abundance of flowers give plants plenty of food and water at first, then gradually withhold water towards fall. 25 and 50c.

STEPHANOPOHYSUM LONGIFLORUM
A medium-sized plant, producing continually a mass of bright red flowers; as free blooming as a Cuphea; a valuable acquisition. 15c.

*STEVIA.
Popular winter blooming plant; flowers white. 15c.

*SPARMANIA AFRICANA.
A tall growing conservatory shrub, producing a profusion of white flowers during winter; flowers large white, with four petals and four sepals, and numerous carmine stamens, with yellow anthers, giving a handsome appearance to the plant; a most valuable acquisition. 25c.

THEVETIA NERIFOLIA.
A tall growing shrub, with linear leaves and with saffron yellow flowers which are produced almost continuously; a very desirable plant. 25c.; larger 50c.

TRADESCANTIA DISCOLOR.
An upright growing plant; underside of leaves purple violet, upperside green; very ornamental. 25c.

TABERNAMONTANA CAMASSA.
Evergreen shrub; flowers white, very fragrant; resembling the Grand Duke Jasmine. 25 and 50c.

TORENIA ASIATICA.
A neat trailing plant; flowers blue; free bloomer. 10c.

THYRSACANTHUS RUTILANS.
Flowers crimson, very graceful. 25c.

VERONICA.
Greenhouse or half hardy evergreen shrubs, with flowers in racemes. All are with coriaceous leaves and natives of New Zealand. Handsome plants, blooming in summer and fall.

V. Buxifolia—Flowers white. 50c.
V. Crassula—Flowers white with yellow anthers. 50c.
V. Epacrioides—Flowers white, in terminal heads. 50c.
V. Travessii—Flowers white. 50c.

Ferns.

The following list includes the most popular varieties; all are of easy culture and require a light soil mixed with leaf mould or peat, good drainage and a shady place in the greenhouse. While all need considerable moisture, care should be taken not to over-water the plants, especially during winter. Prices are for plants in 3-inch pots; specimen plants can be supplied of several varieties at from 50c. to $1 each.

ADIANTUM.
(Maiden Hair Ferns.)

A. Cuneatum—The most popular of the Maiden Hair class. 25c.

A. Farleyense—The Barbados Maiden Hair Fern. This is the handsomest of this group. Fine plants 50c. and $1.

A. Gracillimum—Foliage small; very neat. 25c.
A. Hendersonii—Fronds 6 inches long, pinnate and compact growth. 15c.
A. Macrophyllum—With broad leaves; very fine plants. 50c. and $1.
A. Rhodophylhum—Dwarf, with large bronze foliage. 50c.
ASPLENIUM Belangeri—Fronds 12 to 18 inches long, broad bipinnate; a beautiful variety. 50c.
ALSOPHYLLA Australis—Australian Tree Fern; a showy and rapid grower. 25c., 50c., and $1.
BLECHNUM Braziliense—A subarboreal variety; fronds oblong 2 to 3 feet long. 50c. and $1.
CYRTOMIUM Falcatum—With very broad pinnules. 25c.
DAVALIA Stricta—One of the most desirable ferns for general cultivation; very graceful. 25 and 50c.
DAVALIA Fijienxis—With feathery arching fronds. 25 and 50c.
DICKSONIA Antartica—Tree Fern; fronds very long and very graceful. 25c., 50c. and $1.
DICKSONIA Davallloides—Growth tall and rapid; of decorative effect. 25 and 50c.
DORYOPTERIS Nobilis—A new very broad leaved fern from Japan, distinct from any other. Leaves entire 4 to 6 inches long, arrow head shaped, with white midrib. 50c. each.
LASTREA Aristata Variegata—With a broad band of yellowish green running through the pinnules. 25 and 50c.
LOMARIA Gibba and Lomaria Ciliata—Beautiful tree ferns. 25 and 50c.
LYGODIUM Scandens—Climbing fern; excellent for trailing on trellis indoors. 25c.
MICROLEPIA Hirta Cristata—One of the most graceful varieties; of rapid growth. 50c.

**NEPHRODIIU** Emersonii Cristatum—Ends of fronds crested; a beautiful variety. 25 and 50c.
**NEPHROLEPIS Exaltata** (Sword Fern) Fronds erect and dented. 25c.
**NEPHROLEPIS Davalloides Furcans**—Finely crested fronds, three to four feet long. 50c.
**NEPHROLEPIS Duffi**—With rounded pinnae and gracefully arching fronds. 25c.
**ONYCHIUM Japonicum**—A most graceful fennel-like variety; fronds finely cut. 25c.
**PTERIS Argyrea**—Handsome fronds, with silver white centre. 25c. and 50c.
**PTERIS Cretica Alba Lineata**—Leaves long, narrow; silver centre. 25c.
**PTERIS Hastata**—With black stems and dark green fronds. 25c. and 50c.
**PTERIS Victoria**—Leaves long, narrow, green, with white variegations. 25c.
**PTERIS Tremula**—Fronds 2 to 4 feet long; a most useful and graceful variety. 25c.
**POLYSTICHIUM Capense**—Fronds 1 to 2 feet; pinnules lanceolate. 50c.
**POLYPodium Kurrudrianum**—(Sandwich Island Drooping Fern)—A good plant for baskets. 25c.
**POLYPodium Aureum**—(Hare's foot Fern)—Fronds bluish green; very fine. 50c.

**SELAGINELLAS and LYCOPODIUM**S. Mosses for baskets or rock work; twelve distinct varieties. 10c. each, 75c. per 10.
**Selnaginella Emiliana**—A new upright growing variety with stems branching from the base and forming a dense tuft. 25c. and 50c.

**SPECIAL COLLECTIONS OF FERNS.**
If left to our selection—10 varieties $1; 10 finer varieties $2.50; 10 extra fine $4.
BASKET PLANTS.

For the convenience of persons unacquainted with the most desirable varieties of this class, we will send 10 distinct varieties for $1, or 5 plants for 50c. The latter quantity is sufficient to fill a basket with a bowl twelve inches wide.

SUCCULENTS.

For rock work or vases. All of these plants must be watered very sparingly during winter,

Crassula Cordata—Winter bloomer; flowers white. 10c.

Crassula Spathulata—Trailing variety. 10c.

Mesembryanthemums, or Ice Pinks—Four varieties. 10c.

PALMS.

The large demand of the past few years for these most ornamental plants is an evidence that they are becoming very popular. To meet this demand we have erected two large Palm houses each 140 by 20 feet, which are devoted to their cultivation, and can therefore supply all the best varieties at reasonable prices. We carry in stock upwards of 50,000 Palms of various sizes, all in most healthy condition.

We would state that as all varieties do not grow alike, we cannot quote plants of equal height at the same price. Some are of rapid growth, others affect a dwarf habit. Young plants of such varieties as Phoenix, Seaforthia, and a few others, do not show their characteristic forms of foliage until the third year. The lowest quoted prices refer to 2-year old plants, ranging from 10 to 12 inches, according to variety. We can supply larger plants at proportionate prices.

CULTURAL DIRECTIONS.

Use a compost of rich earth and leaf mould, or peat. Give abundant drainage, and keep plants in a shady place during summer. Water when needed, but do not over-water during winter. Repot every year during February.
Varieties marked with an asterisk (*) are the most hardy and intended for conservatory cultivation. The others require a temperature of not less than 50 degrees in winter.

SECTION I.

**Palmate or Fan-Shaped Leaves.**

*CHAMÆROPS FORTUNII (Chinese Fan Palmetto or Chusan Palm.)*

This is the hardiest of all exotic Palms, and can stand a cold of several degrees below freezing. It is of a graceful habit and very ornamental. No garden should be without it. Thrives best in good rich soil, and if planted where partly shaded from the mid-day sun its foliage assumes a brighter tint. Few Palms are more desirable for decorating apartments or piazzas, as it can stand more rough handling than any other variety. Our stock of plants is very large. We believe that its introduction as a garden tree will soon become general throughout the cotton belt.

Plants 15 to 18 inches high....... 50 each, $4.00 per 10
Plants 24 inches high............ $1.00 each, 7 for $5 per 10
Plants 3 feet high.............. 2.00 each.

*CHAMÆROPS Canariensis,* " Elata,
*" Elegans Argentea, * " Gracilllis,
* " Martiana, " Nivea.

50 cents and $1.

*CORYPHA Australis—Of robust growth and handsome dark green foliage; stands a low temperature. 50c.

*LATANIA BORBONICA (Chinese Fan Palm),*

This variety is most widely known, and for decorative purposes is very desirable. It is of strong and healthy growth, enormous foliage and fine appearance as well as easy culture. Plants attain considerable height and width. We have a large stock of various sizes from 50c. to $5.

**SABAL BLACKBURNIANUM.**

(Bermuda Fan Palm).

Leaves of glaucous green, an excellent and hardy variety. 50c. to $1.

SECTION II.

**LEAVES PINNATE.**

**ARECA Bauerii (Seaforthia Robusta)—**Graceful variety, attaining a height of 15 or 20 feet. $1.

**ARECA Lutescens—**Graceful variety, leaves bright green; petioles and stems yellow. Exceedingly desirable, and considered one of the best varieties for decorating purposes. Several sizes, 50c. to $5.
ARECA Rubra—Leaves bright red in young plants, but changing to dark green in older specimens. A beautiful variety, but must be grown in the shade, otherwise the foliage is apt to burn. 50c. to $1.

ARECA Madagascariensis—Graceful varieties, $1 each.

ARECA Monostachya—Each.

ARECA Sapida, or Kentia Sapida—Of dwarf compact habit; foliage dark green, arched. Very valuable, as it is of quite hardy constitution. 50c. to $1.

ARECA Verschaffeltii—Graceful variety; dark green foliage, with light colored band through centre or midrib; rather tender. $1 to $3.

CARYOTA URENS (Fish Tail Palm)—Of medium growth; leaves with broad pinnules, the ultimate divisions of which have the shape of the tail of a fish. 50c. to $1.

CARYOTA Sobolifera—In general characteristics resembles the above, but with more slender stems and dwarf growth; is increased also by suckers. 50c. to $1.

COCOS Alphonsi—This is known in Southern Florida as the Belair Palm from the large specimens growing near Sanford. The fruit is edible, and all our plants are grown from seeds collected from the Florida trees. In general appearance resembles Cocos Australis, but leaves bright green. 50c. to $1.

COCOS Australis—A tall growing species from Buenos Ayres, of glaucous tint and quite hardy in Middle Florida. 50c. to $1.

COCOS Plumosa—Pinnae, 1 to 2 feet long, clustered in bunches; leaves long and drooping, bunches of waxy flowers. 50c. to $1.

COCOS Bonettii and Cocos Yatai—So far as tested somewhat resembles above in general appearance, but as plants grow older distinctive characteristics may become more marked. 50c. to $1.

COCOS Wedelliana—Unquestionably the most graceful of the smaller growing class; stems slender, erect; leaves long and narrow, of a rich green; gracefully arched. A valuable variety for decorating apartments. 50c. to $2.

*EUTERPE Edulis (West India Cabbage Palm)—Attains a height of 40 to 60 feet with delicate featherly heads and with clean and naked stems. 50c. to $1.

GEONOMA Gracilis—A dwarf-growing variety, resembling somewhat Cocos Wedelliana; requires a moist and warm temperature. $1.

KENTIA Belmoreana (Howea, or Curly Leaf Palm)—A graceful variety, with leaves which have the appearance of being curled; a robust growing variety. 50c. to $2.

KENTIA Forsteriana (Thatch Leaf Palm) The most robust of the genus; leaves broader and stem of darker color. 50c. to $2.

(The Kentias are exceedingly desirable varieties. They hold their lower leaves well and retain a bright color).

MARTINEZIA CARYOTÆFOLIA, or Caryota Spinosa—A handsome species with broad foliage like the Fishtail Palm; the petioles and veins are armed with black spines. $1.

OREODUXA REGIA (Royal Palm)—Of very tall and slender habit. Plants 18 inches. 50c. 2 to 3 feet, 75c. 4 feet, $1.
**PHENIX (The Date Palm)**—A most valuable section for cultivation in greenhouses and apartments. They are of robust constitution, grow rapidly, are very handsome and can stand quite a low temperature. Prices 50c. to $2.

*P-Canariensis*—Foliage narrow and graceful. Very desirable.

*P-Cycadefolia*—Pinnules narrower and shorter than above.

*P-Dactylifera*—The common Date Palm of North Africa.

*P-Farinifera*—A compact growing species and of quite hardy habit. Foliage deep green.

*P-Leonensis, or Spinosa*—With sharp pointed pinnæ; a beautiful variety, but somewhat tender.

*P-Paludosa (Marsh Palm)*—Of medium height, with very long leaves gracefully spreading.

*P-Pumila*—Of rapid growth and graceful foliage.

*P-Reclinata*—A valuable variety, of robust and compact growth, and of great decorative merit.

*P-Rupicola (Rock-loving)*—A species of recent introduction, and of graceful habit. Leaves arching and wide-spread.

*P-Sahariensis Picta Nigra*—A form of the common Date, with dark green leaves.

*P-Sylvestris*—(*Sylvan, or Wild Palm of Bengal, or East Indian Wine Palm*—Leaves very long, greyish-green, pinnæ numerous. One of the hardiest of the genus and a most valuable variety.

*P-Tenuis*—(*Narrow*—Of recent introduction, resembling the common Date Palm, but more slender and finer in all its parts.

*P-Zanzibarensis*—Of recent introduction.
PINANGA Kuhlii (*Ptychosperma Kuhlii*)
A beautiful species from Java, with leaves unequally cut and recurved at base. $1.

*PTYCHOSPERMA* Alexandra*—*(Australian Feather Palm)—Leaves beautifully arched; an exceedingly desirable variety.

SEAFORTHIA Elegans, or *Ptychosperma Cunninghamiana*—(Ulawarra Palm)—An elegant species of graceful habit and rapid growth; leaves very long, dark green; valuable for decorative purposes, and well known. We grow this variety extensively, and can supply plants from 50c. to $5 each.

SAGO PALM.

SECTION III.

CYCADS, Etc.

*Cycas Revoluta* (Sago Palm)—Highly ornamental plant, with a crown of dark green pinnated leaves. Hardy at Savannah. We can supply several sizes from 50c. to $5 each.

Pandanus *Utile* (Screw Pine)—A valuable plant for the centre of vases; foliage spiny. 50c. to $2.

Pandanus Veitchii—Leaves beautifully striped with pure white; a showy plant. $1 to $3.

SPECIAL COLLECTIONS.

We will supply the following collections of Palms, selections to be left to us:

- 10 varieties, 2-year old plants......$ 3 00
- 10 varieties, 3-year old plants...... 6 00
- 10 varieties, 4 to 5-year old plants. 12 00

RHODODENDRONS. *(Mountain Laurel.)*

*RHODODENDRONS. (Mountain Laurel.)*

These shrubs are perfectly hardy, as they are indigenous to the mountains of Georgia and North Carolina. They require a shady situation and a soil rich in leaf mould. Never plant these in places where exposed all day to direct sunshine.

Hybrid Varieties of Catawbiensis.—
These are all grafted plants, which we import annually from Europe. These plants are much superior to the seedlings in the size of clusters and the greater variety of colors, which range from pure white to pink, crimson and purple; 25 varieties. Price of grafted plants, 2 and 3 years, with flower buds, $1 to $1.50 each; $9 to $12 per 10; without flower buds, 75c. to $1.

*Ponicum* (Seedlings)—These vary more or less in shade of color, and range from pink to purple. 3 years old 50c. each, $4 per 10.
CALADIUMS.

This magnificent genus is most valuable for decorative purposes during summer. They do not require a greenhouse, and thus are available to all. These plants vegetate during the summer only. Pot off during March; use small pots at first and do not over-water. As plants grow increase size of pots. Repot four to five times during summer, giving rich earth. Towards fall water must be gradually withheld, and when leaves are well dried the tubes should be put in dry sand and kept in a dry place during winter.

The leaves combine every imaginable color and markings, spotting, veining and marbling. Our collection comprises fifty of the most distinct varieties. 25c. each, $2 per 10.

N. B.—Dry bulbs furnished until April 1st. After latter date plants are sent out in growing state.

New Brazilian varieties after May 1st at $1 each. (See page 3.)

ORCHIDS.

Terrestrial.

These plants are quite easily grown in any greenhouse where the temperature is maintained in winter from 45 to 50 degrees. They are best cultivated in a potting material of fibrous turf, sphagnum or swamp moss, broken pots and charcoal, all well mixed. Syringe freely while the growing season lasts, and decrease the quantity of water when in a dormant state.

Bletia Tankervilleae (or Veiled Nun Flower)—Of easy culture in conservatory; flowers in March or April. Blooming plants $1; smaller size 50c.

Cypripedium Insigne (or Venus Shoe)—Blooms in December and January. 50c.
AZALEA INDICA.

These beautiful early spring flowering shrubs are perfectly hardy in this latitude. They succeed best in a shady situation, and a light soil containing an abundance of leaf mould. Few plants are more desirable for the decoration of conservatories or for blooming in rooms. When pot-grown plants are through their period of blooming, plunge the pots in the ground in a shady situation. The beauty of these plants is only realized when they are planted in masses in open ground.

Our collection consists of upward of one hundred varieties, including all the newest and most distinct, and the plants are in most thrifty condition.

PRICES OF HOME-GROWN PLANTS.

Two years, with flower buds, 6 to 8 inches high 25c. each.
10 plants, our selection of varieties, two years, $2.

We can also supply Plants imported from Europe. These are all grafted, are trained to heads and well set with flower buds.

Prices of Imported Plants—Grafted, 10 to 12 inches high, $1 to $1.50 each. Colors range from pure white to all the shades of red, with variegations and pencilings. Single and double.

CAMELLIA JAPONICA.

A partially shaded situation, especially where protected from the cold winds of winter, is the most desirable. Any good garden soil is suitable, but if mixed with leaf mould better results may be expected. Camellias are perfectly hardy in this section, but much farther north they should be grown in tubs and kept sheltered in winter. The best seasons for transplanting are from early October to beginning of November, and from end of February to end of March.

We grow Camellias very extensively, and can supply plants of upwards of 100 varieties and of various sizes. The colors range from pure white to all shades of red, from a very pale pink to darkest crimson; and with flowers combining exquisite variegations, pencilings, mottlings, etc.

The semi-double varieties are valuable for open ground planting, as they bloom more profusely than most of the double sorts.

Owing to very large fall sales, we can only supply two years old plants of our own growing. No Alba Plena in this size.

Colored Varieties—Plants 8 to 10 inches 25c. each. Alba Plena 10 to 12 inches 50c. each.

CONIFEROUS EVERGREENS.

We believe that we may claim to grow the largest and most varied stock of these plants in the Southern States, and especially of such varieties as are best adapted to this climate. The collections of Biotas or Cupressina, etc., comprise many new and valuable varieties. They are grown in pots during a part of the season, and being sent out with all their roots in a compact ball of earth, there is slight danger of loss in transplanting. We would again urge the necessity of planting small, healthy, pot-grown plants in preference to larger specimens, which can only be furnished from open ground, and with these there is always connected some risk in transplanting. Plants from 4 and 6 inch pots can be supplied until the middle of April.

For full descriptions see Catalogue No.1.

Price for plants grown in 4 and 6-inch pots, unless noted, 50c.; 10 plants, our selection of varieties, $4.

ARAUCARIA EXCELSA.
(Norfolk Island Pine.)

This is one of the most attractive of decorative plants, but is not sufficiently hardy in this section for open ground planting. The plants should be grown in tubs in a conservatory. Plants 18 inches high $3; 24 inches high $5; larger sizes $8 to $10.

Araucaria Imbricata (Chili Pine—Monkey puzzle)—A tree of remarkable aspect. Branches horizontal, leaves stiff and sharp at apex; of a deep green. This tree does not thrive in the middle sections of the South, but is eminently suited to the mountain regions. Imported plants from $2 to $5 each.

ARBOR VITÆ.
(American Section, Thuya).

Aurea, Aurea Conspicua, Aurea Nana, Semper Aurea.

(Grown in the South.)

Gigantea, or Lobbii, Globosa, Peabody.

CEDRUS ARGENTEA—(African Cedar)
CEDRUS DEODORA—(The Great Cedar of the Himalayan Mountains)—A stately tree, attaining a height of 50 to 75 feet, foliage glaucus green, branches feathery and spreading. Perfectly adapted to this climate. We grow an immense stock, and can supply specimens of various sizes. 12 to 18 inches, 50c.; 2 to 3 feet, $1.

CEPHALOTAXUS FORTUNII—(Fortune’s Yew).

CHAMÆCYPARIS VARIEGATA—(Variegated Cypress).

CUPRESSUS (The Cypress).

Of this section we grow many varieties, which are remarkably well adapted to the middle and sub-tropical sections of the South. All are graceful trees, varying in habit of growth, from feathery drooping branches to others of a more erect and formal shape. We cannot too highly recommend these beautiful trees.

Benthami, Briziliensis, Elegans, Excelsa, Ericoides, Funebris, Glandulosa, Gacilis, Knighteana Elegans, Lawsoniana, Lusitanica or Sinensis Pendula, Macrocarpa or Lambertina, Majestica, Nutkaensis, Sempervirens Horizontalis, Sempervirens Pyramidalis, Sempervirens Roylii or Whitleyana.
CALLITRIS QUADRIVALVIS (Thuja Articulata, or African Arbor Vitae).

JUNIPERUS (The Juniper Tree).
Irish, Swedish, Japonica Variegata, Oblonga, Sabina, Squamata.

LIBROCEDRUS DECURRENS (California Arbor Vitae).

PINUS (The Pine).
Longifolia, Massoniana, Strobus Excelsa

PODOCARPUS (Japan Yew).
Japonica, Coronarius.

PSEUDOLARIX KÖMPFERI (False Larch).
The Golden Pine of the Chinese; $1.00.

RETNISPORA—(Japan Cypress).
A valuable genus of small trees or shrubs from Japan, very hardy and desirable for small gardens or cemetery lots.

Filiifera, Filifera Aurea, Pisifera, Pisi-
fera Argentea, Plumosa, Plumosa
Aurea, Plumosa Alba Picta, Squar-
rosa, etc.

SCIADOPYTIS VERTICILLATA
(Umbrella Pine of Japan).
A most striking tree with leaves in whorls, giving the ends of its branches the appearance of small umbrellas. It is as yet quite rare, and we are not determined as to the most suitable locality for its success; but it is hardy in the Middle States, and will doubtless prove best in the Piedmont region. Imported plants, $1 to $3 each.

Hardy Broad Leaved Evergreen Trees and Shrubs for Open Ground.

PRICES.

Plants from 4 to 6 inch pots, unless specially noted, 50c. each: 10 plants, our selection, $4.

Plants are grown in pots, thereby securing safety in transplanting, and enabling us to ship with less danger of loss from removal.

ABELIA RUPESTRIS.
ARDISIA CRENATA.

Alba—With white berries. 50c.
Rubra—With red berries. 50c.

AUCUBA—(Gold Dust Tree).
Japonica—(male) Leaves spotted yellow.
Latimaculata—(female)—Leaves blotch-
ed yellow.
Longifolia—(female)—Leaves narrow, 
green.
Macrodontha—(male)—Leaves broad, 
green.
Picata—(female)—Leaves broadly varie-
gated. 25c.; larger plants 50c.

BERBERIS.
Fortunii—(Fortune's Barberry).
Japonica—(Japan).

BUXUS (Tree Box.)
Argentea 25c., Balearica 25c., Hans-
worthii 25c., Japonica Aureum 25c.

CINNAMOMUM CAMPHORA.
(The Camphor Tree.)
This tree is hardy where the orange 
thrives. It is valuable as an ornamental 
evergreen shade tree as well as for the 
camphor gum which it produces. It is 
of rapid growth. A tree planted in New 
Orleans ten years ago has now reached a 
height of 30 feet. Few trees are more 
desirable for street planting. We have an 
immense stock, and will give special rates 
for quantities of 500 or 1,000. All pot 
grown.

One-year-old plants from 3-inch pots, 
25c.; $2 per 10; $15 per 100.

Two-year-old plants from 4 and 5 inch 
pots, 50c. each; $4 per 10.

CINNAMOMUM ZEYLANICUM.
(The true Cinnamon Tree.)

A broad-leaved evergreen shrub pro-
ducing the cinnamon bark of commerce. 
Much attention is paid to the tree as being 
likely to become one of the most valuable 
products of South Florida; not hardy here.

Two-years-old trees from 5 inch pots, 
50c. each; $4 per 10.

CLEYERA JAPONICA.
ELEAGNUS (Japan Oleaster).
Frederici Variegata, Japonica Macro-
phylla, Pungens Variegata, Reflexa, 
Reflexa Aurea.
ERYOBOTHRYA JAPONICA (Japan Medlar, or Loquat.) 25c.

ESCALLONIA.
Montevidensis. 25c.

EVONYMUS.
Golden Leaved. 25c.

GARDENIA (Cape Jasmine.)
25c. each, $2 for 10.

Florida, Fortunii, Japonica, Japonica Variegata, Radicans, Radicans Marginata.

HELIANTHEMUM, or CISTUS ALGARVENSE (Rock or Sun Rose.) 25c.

ILEX (Holly.)
We have a large collection of these desirable plants, which are conspicuous by the various forms and coloring of their foliage. Any ordinary soil suits these, and a group of a few of the most distinct sorts forms a pleasing feature in a garden. We offer 10 varieties, all grafted and imported plants, 8 to 10 inches high, at 50c. each.

ILLICUM ANISATUM (Anis Tree.)
JASMINUM FRUTICANS. 25c.
LAURO-CERASUS (English Laurel.)
Bertini, Colchica, Camelieefolia, Rotundifolia.

LAURO-CERASUS LUSITANICA (Portugal Laurel.)

LAURUS (Laurel.)
Nobilis (Apollo’s or Spice Laurel.)
Regalis (Oreodaphne Californica.)

MAGNOLIAS.
Grandiflora—The king of the Southern broad-leaved evergreen trees; needs no description. 1 foot, 50c.

Grandiflora Gloriosa—A sub-varietey of Grandiflora, with flowers of immense size, often 12 inches in diameter; foliage large and bronze underneath; a magnificent tree. 2 years grafted plants $1.

Fuscuta (Banana Shrub)—Dwarf growing variety; in April or May it is covered with a profusion of small flowers, exhaling a most exquisite fragrance, similar to a ripe banana; a great favorite. 8 to 10 inches 25c.; larger sizes 50c.

MYRICA RUBRA (of Seibold and Zuccarini.)
A small evergreen tree with oblong lanceolate and serrated dark green leaves; it grows especially in the mountains of Southern Japan, where it is named Yamamomo, or Mountain Peach. Fruit blossoms appear in early spring and the fruit ripens during July. Fruit resembles in shape a firm blackberry 1 inch long by $\frac{3}{4}$ inch in diameter, and contains a single hard seed or stone. When fully ripe it is pleasantly acidulated and juicy. It is used as a dessert fruit or for jellies and for making a fermented drink. There are dark red and light rose fruited varieties. The bark is used for dyeing a fawn color. Altogether this is said to be an exceedingly ornamental tree, extensively planted in Japan both for ornament and fruit, and will doubtless prove a desirable addition to our hardy evergreens. Plants seem to be difficult to obtain in Japan, because they are seldom propagated, and chance seedlings are depended upon. We have succeeded in growing a limited quantity of plants. Plants 2 years old from 4-inch pots, 50c. Not fruited here so far.

OLEA FRAGRANS (Tea Olive.)
One of our most desirable and popular shrubs; flowers white, small, but of exquisite fragrance, and blooms nearly all winter. Several sizes, 25 and 50c.

OSMANTHUS.
Plants allied to Olea Fragrans, but with prickly toothed leaves. 25 and 50c.

Aquifolium (Holly-leaved), Aquifolium Argenteum, Aquifolium Aureum.

PHOTINIA SERRULATA.

PITOSPORUM TOBIRA.
Variegata (Variegated)—25 and 50c.

RUSCUS ACULEATUS (Butcher’s Broom)

VIBURNUM.

Odorattissimum (Chinese)—25 and 50c.

Tinus or Laurustinus, Suspensum.
The plants offered in this list were all grown in open ground during last summer and potted during January in three or four inch pots. Plants of the Tea, China and Polyantha classes vary in height from 8 to 12 inches, and of Hybrid Perpetual from 10 to 18 inches.

No order can be filled before March 15th, as plants are in growing condition, and if planted out before danger of frost is past, loss may ensue. After May 1st no plants will be sent out, as success in transplanting is then uncertain.

Prices 25c. each; 10 plants, our selection, $2, or 100 plants for $15.

SECTION I—On Own Roots.

TEA and CHINA.

Azelie Imbert—Canary yellow.
Coquette de Lyon—Pale yellow.
Catherine Mermet—Silvery rose.
Duchesse de Brabant—Salmon pink.
Etoile de Lyon—Canary yellow.
Louis Richard—Coppery rose, deeper centre.
Mme. Camille—Rosy salmon, very large.
Mme. Camo—Salmon pink.
Mme. Franziska Kruger—Blush, salmon centre.
Mme. Damaizin—Salmon pink.
Mme. Hoste—Light yellow, shaded buff.
Mme. Scipion Cochet—Yellowish, shaded rose.
Marie Guillot—Pure white, dwarf.
Marie Lambert—White.
Reine de Portugal—Yellowish, mottled pink, coppery hue.
Vicomtesse de Wautiers—Rose, tinted white and dark rose centre.
Zelia Pradel—White, with yellowish centre; half climber.

POLYANTHA.

The Polyantha are exquisite miniature roses of the most free flowering habit and of dwarf growth.

Clothilde Soupert—Flowers 1 ½ inches in diameter, beautifully formed; white, with rose or light carmine centre; a constant bloomer; a desirable variety for cemeteries.
Cecile Brunner—Salmon pink, deeper centre.

HYBRID PERPETUAL.

Abel Carriere—Velvety crimson.
Anna de Diesbach—Satin rose.
Blanche de Meru—Light flesh.
Charles Margottin—Red or scarlet crimson.
Crown Prince—Purplish crimson.
Deuil du Colonel Denfert—Dark purple, velvety.
Dr. Sewell—Crimson scarlet, shaded purple; free bloomer.
Duke of Connaught—Deep crimson, velvety, dwarf; a free bloomer.
Gloire Lyonnaise—Very large, white when fully expanded, but canary yellow while in bud; vigorous grower.
John Hopper—Deep rosy red.
Mme. Alfred Carriere—White, blush centre.
Mme. Moreau—Deep brilliant carmine; perpetual bloomer and best of its color.
Magna Charta—Bright pink.

When sending private checks on banks outside of Augusta, please add 10c. for all amounts less than $50; 25c. for amounts of $50 to $100 for cost of collection.

Order Only, and if necessary to give additional instructions, use the space headed Remarks. No orders filled for less than One Dollar.

No Plants Sent by Mail. No plants sent C. O. D. unless one-half the amount is remitted before shipment. We never substitute unless fully authorized. Please state if substitution is allowed. Should plants first ordered be exhausted, Yes, No.
Please do not write in this space.

No.
Paul Neyron—Deep pink, very large; an extra fine rose and very free bloomer.
Prince Camille de Rohan—Very dark brownish crimson.
Sidonie—Light pink.
And a limited number of plants of thirty other varieties.

SECTION II.

_Budded on Manetti Stock._

Prices from 4-inch pots 25c. each; $2 per 10.

**HYBRID PERPETUAL.**

Baronne de Rothschild—Rosy pink.
Captain Christie (Climbing)—Flesh, with deeper centre.
Louis Van Houtte—Dark crimson maroon.
Mabel Morrison—A pure white form of Baronne de Rothschild.
Ornement des Jardins—Brilliant crimson.
Pride of Reigate—Crimson, striped white, sometimes solid rose.
Queen of Queens—Light rose, with darker edge.
Ulrich Brunner—Cherry crimson.

**TEA, HYBRID TEA and NOISETTE.**

American Beauty—Deep rosy carmine.
Augustine Guinoiseau, or White La France—Large, white tinted rose.
Chromatella, or Cloth of Gold—Yellow, climbing.
Devoniensis (Climbing; Tea)—White, creamy centre.
Emily Dupuy—Pale fawn, climbing.
La France—Silvery peach.
Mme. Caroline Testout—Clear pink.
Mme. de Watteville—Yellowish, margined pink.
Mme. Margottin—Yellow, apricot centre.
Marechal Niel—Chrome yellow; a favorite variety; climber.
Nyphetos (Climbing)—Pure white, fine in bud.
Papa Gontier—Bright carmine.
Perle des Jardins—Bright yellow, best when budded.
Prince Bismarck—Large, imbricated, soft rose.
And a limited number of plants of thirty other varieties.
